ABOUT

Experienced Frontend Engineer with 4+ years of expertise in building responsive, scalable web applications using React, Redux and Next.js. Passionate about building elegant, performant UIs and exploring bleeding-edge tech like AI integrations and blockchain-based applications. Strong believer in clean code, collaborative problem solving, and purposeful design.

EXPERIENCE

Full Stack Engineer

May 2025 – Present

Straw Hat Labs · Bengaluru, India

- Leading development of Web3 applications and Chrome extension for Solana-based trust network
- Architecting and implementing full-stack solutions with focus on scalability and security

Frontend Engineer

Apr 2023 – Mar 2025

Forta Health · Remote, USA

- Improved frontend performance by 30% through strategic refactoring and bottleneck identification.
- Built mobile-friendly reusable UI components and optimized API calls to reduce load times by 40%.
- Led development of an AI-integrated React POC streamlining clinical workflows.
- Collaborated across backend and QA teams, cutting down bugs by 25%.

Research Engineer

Jun 2021 – Mar 2023

Straw Hat Labs · Bengaluru, India

- Delivered 2 Solana Blockchain dApps, integrating smart contracts and frontend features.
- Built Flutter-based mobile applications with DeFi integrations (Orca, Raydium).
- Led team development of multiple POCs for blockchain and NFT platforms.

PROJECTS

Buildspace NFT Staking

GitHub ↗ Live ↗

Developed an end-to-end web app for minting and staking Solana NFTs. Integrated smart contracts using Rust and Anchor.

Rust

Screenlytics

Live ↗

Privacy-first Android app for screen time analytics. All processing runs on-device using Android's UsageStatsManager — no account, no data leaves the device.

Flutter

Lazy Whale

GitHub ↗ Live ↗

Built a dashboard using Supabase & Next.js that tracks and analyzes Solana & Ethereum NFT whale activity in real-time.

TypeScript

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Sep 2017 – Jun 2021
